

Antony Lee McGarry-Thickitt

mail: [REDACTED] | tel: [REDACTED] | email: jobsearch@wedgedoc.com

“ A self-taught, enthusiastic developer with a keen interest in graphic design. I have excellent communication skills - in my last role I was the first choice to produce any project documentation or user guides. My previous role ended due to the company being bought out by a division of BUNZL which out-source the vast majority of their development work. ”

Employment History

Oct 2009 - Mar 2016 Developer at *mda (formerly POS Direct Ltd.)*, Leicester

Design and development of desktop, scanner app, console applications and web applications for use in an ordering / stock management environment. Scope of worked ranged from small one-man jobs (XML / CSV importers for example) to a SCRUM managed management system developed over the course of three years. Role was a VB developer which was learned in-situ. Web sites were developed in ASP.NET with Ajax and JQuery. Desktop applications were developed in WPF implementing an MVVM framework, Win Forms (for the creation of Handheld barcode scanning applications for stock management purposes) and Microsoft Access (97-2003). Database work was in SQL Server, for four years using LINQ as well as traditional SQL interactions.

Nov 2008 - Oct 2009 E-Learning Multimedia Developer at *University of Northampton*, Northampton

Twelve months maternity cover. Working for the Business School, this role focused on the production of e-learning materials on CD for distance learning students. Assisted the Lead Developer with scripting projects for web-based solutions. Resources created with HTML, CSS, PHP and Flash ActionScript (very basic level).

Jun 2008 - Nov 2008 E-Learning Multimedia Developer at *University of Northampton*, Northampton

Five month fixed contract. Designed and developed an on-line resource which focussed on using new and emerging technologies within the university teaching environment using HTML, CSS, PHP and JavaScript

Jan 2004 - Jun 2008 Business Analyst at *Caski Consulting Ltd.*, Based in Bristol - work at various sites.

A varied role, dependent on individual contracts. Development of a Decommissioning application for use in the shut-down process of Nuclear Power Stations in *Microsoft Access*. Role included technical authoring of decommissioning documents, software testing (using in-house software) and the development of a small site for the association of the company with a US based management consulting company using PHP, HTML, CSS and JavaScript.

Jul 2001 - Jul 2002 Project Data, Change & Communications Facilitator at *BNFL (Wylfa)*, Anglesey

A twelve-month contract to assist with the implementation of a new work management system being implemented across all BNFL sites. Role included the cleansing of data to aid the transition as well as communicating the changes to staff on site. On own initiative, learned VBA to develop a number of small applications in *Microsoft Excel* and *Access* to aid the process as well as a database application for tracking issues arising during the project.
